Dear George,

It seems ages since I was in Milwaukee & not having heard from anyone I've been wondering how everything is moving along.

Have you had any success with booth & program sales?

Can you conveniently drop me a few lines & let me know whats going on.

I no doubt will be here for 2 to 3 weeks more. The work here is quite extensive & far beyond the original estimate so we are stuck until of course the job is finished. There are 6 of us here each of course doing certain specialized work.

Give my regards to Mrs Bowen

Dear George,

Thanks for your letter of the 23rd together with the enclosed correspond from Rex.

I read with interest his comment + your own tabulation of sales. The booth situation will necessitate a change in plans so that ends will meet. gratifying to note how well the program space is selling.

meetings should begin to be called more regularly as the space at the Schroeder is available at any time.

I wild be stuck here for longer than I anticipated as additional work has been piled on to me on the present job. Let me hear from you aga George if anything turns up
